

QPP | QUALITY PAYMENT PROGRAM

Let Us Help You Navigate QPP

The Quality Payment Program establishes ways to reimburse clinicians for caring for Medicare patients, based on value not volume, through the Merit-based Incentive Payment System (MIPS).

VERADIGM'S PINNACLE REGISTRY® AND DIABETES REGISTRY® COLLABORATIVE CAN HELP

Ease your reporting burden. Free to participate, both registries provide powerful clinical insights to practices, easily capturing valuable data on coronary artery disease, hypertension, heart failure, atrial fibrillation and diabetes in the outpatient setting. The PINNACLE Registry and the Diabetes Collaborative Registry have jointly self-nominated as a Qualified Clinical Data Registry (QCDR) for the 2021 MIPS Program Year.

As an approved QCDR, the registries offer an easy solution for practices to report MIPS for the 2021 program year. Reporting to the Centers for Medicare and Medicaid Services (CMS) is a free benefit to practices currently submitting data via the registries with the benefit of interoperability from most electronic health record (EHR) systems. Practices also have the option of reporting as individual providers or at the group level.

AS A QCDR, THE PINNACLE AND DIABETES COLLABORATIVE REGISTRIES:

Help you meet the Quality (valued at 40%), Promoting Interoperability (valued at 25%), and Improvement Activities (valued at 15%) for MIPS reporting.

Simplify MIPS reporting—fully integrated with most EHRs, both registries capture data you include in the registry and **reports it to CMS for you.**

Are easy-to-use and **require only a few hours a week** to review data so you can focus on your patients instead of the electronic paperwork.

Help your providers earn bonuses and avoid penalties for non-participation in QPP by making reportings hassle-free and participation is **FREE.**
