eCQM:CMS69v10	Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow- Up Plan	Patients with a documented BMI during the encounter or during the previous twelve months, AND when the BMI is outside of normal parameters, a follow-up plan is documented during the encounter or during the previous twelve months of the current encounter.	Process	Community/Population Health	Preventive Care	
CQMS 226 (NQF 0028)	Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention (AMA-PCPI)	Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 24 months AND who received tobacco cessation intervention if identified as a tobacco user. *3 performance rates*	Process	Community/Population Health	Prevention and Treatment of Opioid and Substance Use Disorders	PINN-104 DCR-4
eCQM:CMS138v10	Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention	Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 24 months AND who received tobacco cessation intervention if identified as a tobacco user. *3 performance rates*	Process	Community/Population Health	Prevention and Treatment of Opioid and Substance Use Disorders	PINN-104 DCR-4

2022 CMS Requirements

Individual Provider Reporting: Eligible providers must report at least six measures, including one outcome measure. If an outcome measure is not available that is applicable to your specialty or practice, choose a high priority measure. Measures must be calculated with at least 70 percent of the providers patients (all-payer) included in the denominator.

Group Practice Reporting: A group is defined as a single tax identification number (TIN) with two or more clinicians (at least one clinician within the group must be MIPS eligible) as identified by their national provider identifier (NPI), who have reassigned their Medicare billing rights to a single TIN must report at least six measures, including one outcome measure. If an outcome measure is not available that is applicable to your specialty or practice, choose a high priority measure. Measures must be calculated with at least 70 percent of the providers patients (all-payer) included in the denominator.

Measure specifications for CQMS measures are available where hyperlinked. All measures are proportional, traditional (unless indicated differently under Measure Type) and are not risk adjusted.
