veradigm

EXPAND **PROVIDER REACH** THROUGH **ONE CONNECTION**

Reaching providers across multiple EHRs doesn't have to mean managing multiple integrations. Through one of the industry's largest multi-EHR provider networks, **Veradigm helps health plans connect to more than 300,000 independent providers nationwide,** with additional connectivity available through participating Epic organizations.[1]

The Challenge

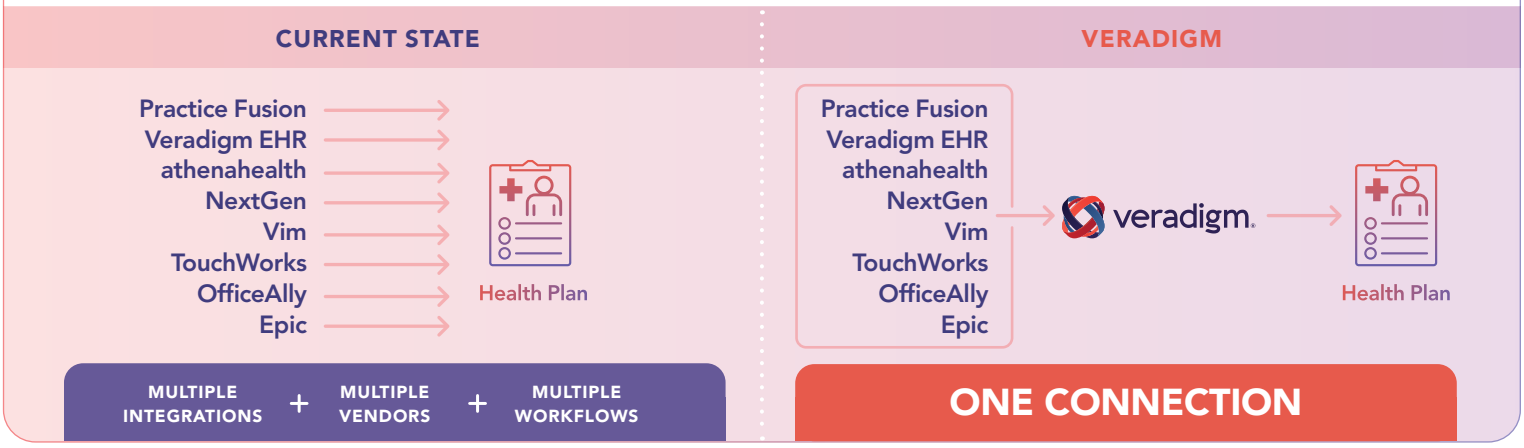

Independent provider connectivity shouldn't require a patchwork of vendors.

Independent providers are spread across dozens of EHR platforms. As provider networks grow, many health plans also inherit additional integrations, vendor relationships, and operational complexity. Managing provider connectivity at scale shouldn't require managing dozens of connections.

The Provider Connectivity Challenge

Instead of one connection, many health plans manage separate relationships across multiple EHRs, resulting in:

- ✓ Multiple vendor relationships
- ✓ Separate EHR integrations
- ✓ Increased implementation and maintenance effort
- ✓ Inconsistent provider coverage across the network
- ✓ Additional complexity as networks continue to grow

ONE CONNECTION. BROADER PROVIDER REACH.

Veradigm helps health plans connect to providers through a single multi-EHR network. Instead of building and managing separate integrations, health plans can connect to one network that supports provider data access and actionable information across a broad ambulatory footprint.

- One connection to 300,000+ independent providers nationwide
- Access provider data and deliver actionable information through the same network
- Reduce integration complexity across your provider network
- Additional connectivity available through participating Epic organizations
- Scale provider connectivity as your network evolves

ONE CONNECTION

300,000+ INDEPENDENT PROVIDERS

ONE OF THE INDUSTRY'S LARGEST MULTI-EHR NETWORKS

Why a Multi-EHR Network Matters

Broader Provider Reach

Connect to more than 300,000 independent providers nationwide through a single network, with additional connectivity available through participating Epic organizations.

Simpler Connectivity

Reduce the complexity of managing multiple EHR integrations and vendor relationships through one scalable connection.

Better Quality Performance

Access provider data and deliver actionable information directly into provider workflows to support quality initiatives, care management, and provider engagement.

Built to Grow With You

As provider networks evolve, a multi-EHR strategy makes it easier to expand connectivity without continually adding new integrations.

WHY VERADIGM

VERADIGM HELPS HEALTH PLANS EXPAND PROVIDER REACH THROUGH ONE OF THE INDUSTRY'S LARGEST MULTI-EHR PROVIDER NETWORKS.

Whether you're building a new connectivity strategy or expanding an existing Veradigm connection, our network is designed to help you scale without adding unnecessary complexity.

1. Connect to 300,000+ independent providers nationwide
2. One of the industry's largest multi-EHR provider networks
3. Access provider data and deliver actionable information through one connection
4. Extend provider reach with connectivity available through participating Epic organizations
5. Scale provider connectivity without adding new integrations

Built for health plans looking to expand provider reach through one connection.

Expand What's Possible for Your Network

Whether you're evaluating provider connectivity for the first time or looking to get more from your existing Veradigm connection, a brief conversation can help identify opportunities to simplify connectivity and extend provider reach.

During a Provider Connectivity Review, we'll:

- ✓ **Review your current provider connectivity strategy**
- ✓ **Identify opportunities to streamline provider connectivity and expand provider reach**
- ✓ **Explore how a multi-EHR network can help simplify connectivity**

Schedule a Provider Connectivity Review
