CAPSULE TECHNOLOGIE

(DataCaptor Software)

The DataCaptor Software is used to record clinical data, and Customer acknowledges and agrees that the use of the DataCaptor Software does not absolve the user's obligation to exercise independent medical judgment in rendering health care services to patients.

Customer acknowledges and agrees that the DataCaptor Software is NOT designed for applications that require 100% availability and error-free data.

Customer acknowledges and agrees that Capsule Technologie cannot guarantee the network connectivity and that some medical devices may malfunction or otherwise have their operation affected when connected to a network and involved in data transaction via their communication port.
